

- **Designed for Pediatric Care**
- **Dynamic Immersion**
- **True Low Air Loss**

Featuring true low air loss, providing microclimate control, immersion/pulsation therapy, alternating pressure and massage, the Advanced WAVE™ Support Surface has become a proven and often preferred alternative to Air Fluidized Therapy. By continuously sensing and maintaining an optimal therapeutic setting, The WAVE™ automatically adjusts and readjusts for the patient as needed. It is the most effective means of multi-zoned, dynamic low interface pressure therapy in the market today.

Intended explicitly for pediatric care, the Pediatric WAVE™ was designed with clinical input to provide the highest levels of protection and functionality. Our exclusive WAVE™ technology surfaces offer unprecedented levels of safety for both patients and caregivers.

For Treatment of ⁽¹⁾:

- Traumatic birth defects
- Complicated wounds, flaps, grafts and burns
- Deep tissue injuries
- Prevention and treatment of moisture associated skin damage
- General pain management

Features / Benefits:

- Customizable low interface pressure based on patient's weight and height
- 2" Visco foam base for indwelling procedures
- Microclimate control
- Integrated battery back-up system
- Quiet operation
- Dynamic immersion/pulsation therapy
- Non-heat generating
- Exclusive controller mounting bracket

Standard Size	Weight Capacity
60" x 30" x 6"	1 – 100 lbs.

⁽¹⁾Contraindications: Unstable cervical neck, spine and pelvic girdle.
